

VIP MOBILE

Custom Digital Store & Business Platform — Value Proposal

Website Development Value	PKR 200,000–250,000+
First-Year Support / Digital Setup	Included
Current Samsung S23 Reference	PKR 90,000
Google Pixel 10 XL Reference	Approx. PKR 230,000

What You Are Getting

This is not simply a basic website. VIP Mobile is being positioned as a complete custom digital store: a customer-facing storefront plus an administrative system for managing products, branches, brands, categories, sales, reviews, notifications, staff and other business operations.

Key Features

- Modern mobile-friendly online storefront
- Admin dashboard for managing the store
- Products, brands, categories and colours
- Branch management and branch-specific storefronts
- Product details, images, pricing and availability
- Wishlist and product comparison
- Customer reviews and review links
- Buy-request / enquiry workflow
- Sales and portal management
- Staff and audit-log management
- Homepage/banner management
- Notifications and social/content management
- Password/reset and account management
- SEO-ready routes including sitemap and robots configuration

Why Custom VIP Mobile Instead of Shopify

Shopify is a strong hosted platform, but it is subscription-based and you are working inside a platform's predefined ecosystem. This VIP Mobile solution is being built specifically around the business, with the store experience and administration tailored to VIP Mobile's requirements.

Area	VIP Mobile Custom Platform	Typical Shopify Approach
Ownership / Control	Custom-built around your business	Platform-based subscription
Admin	Business-specific admin features	Shopify admin + apps
Storefront	Fully custom UI/flows	Theme + customization
Branches	Built into the platform	Often requires additional configuration/apps
Product workflows	Custom workflows	Standard + apps/customization
Future changes	Can be developed specifically for VIP Mobile	Bound by platform/theme/app ecosystem

The First-Year Value

The intention is to hand over a complete working digital platform and cover the initial setup/support from our side during the first year, rather than making you pay separately for every small improvement or technical requirement.

The estimated market value for a good custom business website of this level is around PKR 200,000–250,000 or more depending on scope. The value here is not just the front-end website: it includes the underlying admin/business functionality and room for continued improvements.

In practical terms, the website development value itself is substantially higher than the PKR 90,000 reference value of the Samsung S23. That makes the proposed exchange primarily a value-for-value business arrangement rather than simply selling a phone.

Proposed Exchange Understanding

Item	Reference Value
Samsung S23 currently owned	PKR 90,000
VIP Mobile custom website/platform	PKR 200,000–250,000+ estimated development value
Google Pixel 10 XL discussed	Approx. PKR 230,000

Based on these reference values, the website/platform represents a significantly larger development investment than the current PKR 90,000 value of the Samsung S23. The final exchange terms can simply be agreed between both sides according to the actual Pixel/device condition and agreed value.

Why This Can Be Valuable for VIP Mobile

The goal is to move VIP Mobile from relying only on walk-in/WhatsApp-style selling toward having a professional digital presence where customers can discover products, compare options, check details, submit requests, interact with the business and where the owner/team can manage the underlying information from one place.

The platform can also be expanded over time. New modules, automation, marketing tools, product features and customer-facing improvements can be added as the business grows.

A Business Asset, Not Just a Website

The most important point is that the investment is in a digital business asset. A normal brochure website mainly displays information. VIP Mobile is being built as an operational store with a storefront and management layer, giving the business a foundation that can continue evolving.
